

## ***'Project yourself into the future' - AIPM Conference 2005 in Melbourne***

### **Stream 1:**

### **Project the individual into the future**

- What is the future project manager going to look like? Topics may include certification, competencies, assessment, training, professional development, motivation, expectations, capabilities and place within public and private sector organisations.

### **Stream 2:**

### **Project the organisation into the future**

- Where are companies heading that run projects? Topics may include to discuss what work environment will be created for a project manager, how companies mature in project management and change management, about globalisation trends, what the role of PMO certification is, a best practice case study in project management.

### **Stream 3:**

### **Project the industry into the future**

- What are industry trends in project management? Topics may include a case study on project management trends, standardisation of project management within industries, a discussion about in what industries project management will experience the biggest steps towards standardisation.

### **Stream 4:**

### **Future research**

- How does our future look like? Topics may include how the future impacts on individuals, organisations and industries, how the future impacts on project management and project management maturity models.
