

Australian Institute of
Project Management

AIPM

- The Australian Institute of Project Management is the premier project management institution in Australia and is a respected leader in the project management community globally.
- Our vision is for the AIPM to be the preferred institute to deliver services to its professional members and partners, and regarded as a world authoritative reference on project management practices and competency.

Objectives – Strategic Plan

- Relevant member services
- A voice for the project management community
- Internationally recognised competency standards
- Professional project management development and certification
- Initiation and support for research in project management
- Encouragement and recognition of excellence in project management
- Internal Structure and Administration
- Codes of Ethics and Professional Conduct for the project management community

Welcome

Welcome from the AIPM President

Dr Bill Young

The AIPM is proud to have been chosen to host the 25th IPMA World Congress 2011 in Brisbane, Australia.

With the International Project Management Association representing the national Project Management associations of some 50 countries this congress is going to be the global conference of the year.

Some of the best minds and experienced practitioners in Project Management globally will be there. This will be a 'not to miss event'.

The Congress theme '**Delivering the Promise**' strikes at the very core of what project and program management is fundamentally about. We promise our customers specific outcomes – our challenge then becomes delivering on those promises.

We live at a time in history where the rate of change is simply phenomenal. Along with this is an increased sense of expectation – and in project terms this is for delivering project success and capital effectiveness.

Countdown to Conference:
in 338 days, 12 hours, 53 minutes, 22 seconds
