What are the essential competencies of a project manager?

David Baccarini, asks What do we mean by project management competencies? What are the essential competencies of a project manager? Are they different across different industries? Do project managers need to be technically qualified? Do project managers need a project management qualification? This presentation will answer these questions... and more! David will present the results of analysis of 150 job adverts for project managers in three industries—building, engineering and ICT. The results are surprising!

Your views will be sought and your opinions will contribute to ongoing research.

David Baccarini, Associate Professor & AIPM Fellow

David is Director of the Project Management Program at Curtin University. In 1993 he created the project management program at Curtin University, which is now one of the university's largest post-graduate courses. His areas of interest are project management and risk management.

This meeting presents an ideal networking opportunity to discuss the attributes of project management with your peers.

Join us for our closing event for 2011.

*LOOK OUT FOR UPDATES ON OUR 1 DAY CONFERENCE
TO BE HELD ON WEDNESDAY, 28 MARCH 2012*
